

Most intelligent Americans are overwhelmingly against the measures you plan to take on Monday. The June 2nd vote is important to all citizens.

You cannot allow even more concentration of media ownership since it will result in a narrower range of opinions and viewpoints in the mainstream media. It will mean that a handful of companies will dominate our public discourse to an extreme extent. Please help to preserve what diversity of media we still have and allow us to keep our information democracy!

It seems you are set to ignore valid criticism of your actions and ram these changes on through. I hope that at the last minute you realize how strong opposition is to your actions and come around.

If this passes it shows how our government administrators have become servants of these powerful media corporations.

Thank you.
